Exposure: Gulp | Webpack | Passport | Mocha | Ionic | ReactJS | Flux | Firebase | Bootstrap | Foundation | Parse | Mongoose | AWS | Heroku | Apache Cordova

---

Summary

Full-Stack Javascript Developer living and breathing software development in an immersive live-in coding bootcamp located in Silicon Valley. My mission is to create functional, elegant, and robust services for the web and further technology's potential to help the world.

Professional Experience

Full-Stack Developer and TA	Coding House	Fremont - California	2015 – Present
(While In School) Mediator	Attorney General	Boston – MA	2014 - 2015
(While In School) Researcher	European Union	Brussels – Belgium	2013 – 2014
(While In School) Digital Specialist	Northeastern University	Boston – MA	2011 - 2013

Full-Stack Developer and Teacher's Assistant at Coding House:

- Worked in teams to create full-stack applications for both mobile and web using Angular, NodeJs, and Express.
- Conducted workshops with students on a variety of topics, including, but not limited to: AngularJS, Git, Gulp, Webpack, and modularization best practices.
- Graded student projects and provided detailed critique and feedback on their code, implementation, and deployment.
- Assisted Students in problem solving and bug diagnosis.

Researcher & Analyst at the Hungarian Office of the European Parliament:

- Conducted research and analysis for the Hungarian MEP on minority rights issues, with particular focus on European women and the European Roma population.
- Extrapolating information from the European Union's publications and research to brief the MEP on Roma integration issues.
- Utilized the Framework for National Roma Integration Strategies policy to identify successful elements for incorporation in a new 2014-2020 strategic plan.
- Participated in parliamentary policy meetings and development of talking points used by the MEP in BBC.

Education

Bachelor's Degree in Political Science	Northeastern University - MA	2011 - 2015
