Professional Experience

Front-End Developer	Cookin'	Chapel Hill – NC [remote]	2017-01 – Present
Product Developer	Integrify	Carrboro – NC	2016-03 – Present
Bootcamp Teacher's Assistant	UNC Coding Bootcamp	Chapel Hill – NC	2016-06 – 2017-02
Full-Stack Developer	EJJ Solutions	Chapel Hill – NC	2016-01 – 2016-03

Front-End Developer at Cookin':
- Leveraged React and Redux to design and implement mockup-perfect components.
- Supplemented Redux with Redux-Act and Redux-Thunk
- Used Bitbucket for version control.

Product Developer at Integrify:
- Responsible for UI/UX design for new version of flagship application.
- Developed features across the full stack with Angular 2, Angular 1.5, Angular Material, Gulp, SCSS, Jade, D3.js, Node, Express, MySQL, and MongoDB/Mongoose.
- Coordinated projects and deadlines with team using ZenHub.
- Produced a number of custom Angular directives/components used widely throughout the application.

Bootcamp Teacher's Assistant at UNC Coding Bootcamp:
- Assisted students with Javascript, React, Node, MySQL, Express and general full-stack development.
- Filled in as an instructor for days the principal instructor was absent.
- Graded student projects and provided detailed critique and feedback on their code, implementation, and deployment.
- Assisted Students in problem solving and bug diagnosis.

Full-Stack Developer at EJJ Solutions:
- Independently developed the consumer-facing marketing website for VINBeam, a company that produces a device that provides inventory management and data analytics for cars at dealerships. Used the MEAN-Stack.
